

SOLARTECH
UNIVERSAL

Florida's Only
Solar Panel Manufacturer

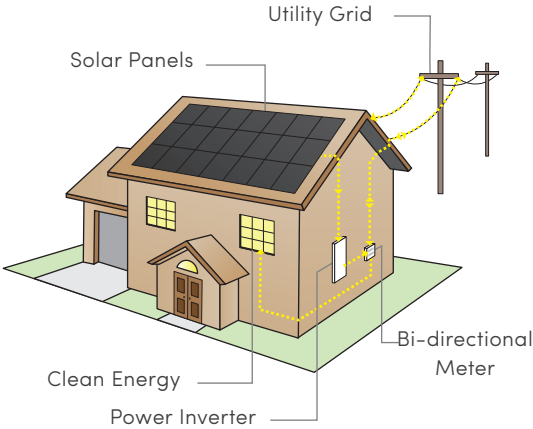

Capture the Power of the Sun
Generate Savings for a Lifetime

- **Reduce** Carbon Footprint
- **30%** Federal Tax Credit
- **Increase** Home Value
- **Fixed** Energy Cost
- **\$0** Down

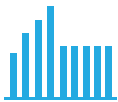

- 1. Sunlight enters the **Solar Panels**, generating a flow of electricity.
- 2. The **Power Inverter** converts direct current (DC) to standard grid alternative current (AC).
- 3. The **Bi-directional Meter** tracks how much energy is produced compared to the amount of energy that is consumed.
- 4. The extra **Clean Energy** will be sent to the utility grid in a process called **Net Metering**. Learn more on page 4.

Lifetime Savings

By taking your power into your own hands, you remove the monthly cost of paying your energy bill. Those payments can really add up!

Fixed Energy Cost

When you generate your own energy, you can rest assured that even if the utility changes its rates, your bill won't go up.

Increase Home Value

Studies have shown that homes with solar systems are sold more quickly, at higher values, than those without, adding up to \$4 per watt to your home value.

30% Tax Incentives

Tax incentives can make a huge difference in the cost of your system, oftentimes providing monthly payments that are lower than your current monthly energy bill.

Help The Environment

A 5kw solar system can reduce your carbon (CO²) emissions by 5.1 metric tons – that's the equivalent of one passenger vehicle driven for an entire year.

Easy Steps to Go Solar

1. Solar Consultation

One of our solar genius will answer all your questions.

2. Certified Installer

Our installers will guide you through the entire process.

3. Solar Financing

Discuss the many options for financing your solar system.

4. Solar return

Start producing energy and savings immediately

Net Metering

Bi-directional
Meter

Net Metering is used when a solar system is connected to a utility power grid. If the system produces more energy than the owner needs, the excess power is sent to the utility grid. The bi-directional meter tracks that energy, so it can be deducted from that month's bill or credited toward a future bill in the same calendar year.

Financing

We offer the best options for going solar and we're here to help you every step of the way.

Your Options	LOAN	CASH	PACE
Down Payment	\$0 Down	Outright Purchase	\$0 Down
